Cover for ISEO F5 Keys, it designed to cover the key top part which is useful to mark keys

I uploaded two versions normal and thick one, the normal one have thickness of 1mm on each side while the thick have 2mm.

To print it you need to pause mid print place the key then resume.

For the normal version the pause will be at layer 22 (3.35mm) while for the thick one at layer 29 (4.4mm)

Printed on a custom built 3d printer using Polymaker metallic blue PLA Pro and Eryone china red PLA
