On my Canon EOS R6 the cover on the LCD Swivel broken off. Canon support does not sell just the plastic cover. I took it to 3d modeling and made the part that fits PERFECTLY on my Canon R6.

Easy to print, i recommend, High Quality setting .10mm. I have default for everything else. Add supports if needed. I fee it does help support the screw port. After print, take a small drill bit to finalize the hole and done. Clips and and protects the LCD cable port.
