Tags: [repairpart](#) [zip](#)

I made lot of models with 3D printer during last 4 years.
Some of them were exposed on my stall at Maker Faire Prague 2021.
Now I would like to offer some of them for other 3D printing guys.

There is one small and simple piece for replacing broken ZIP Hanle.

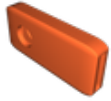

It consist from two parts. The first one is capsule which is used as paper clip cover and the second one is plug which is fixing clip inside the capsule.

It can be printed from any type of filament with layer 0,2 mm.
