Summary

Patterned, threaded jar for holding things.

[Hobby & Makers](#) > [Organizers](#)

Tags: [desktop](#) [container](#) [household](#) [abstract](#) [pattern](#)
[threaded](#) [stash](#) [decorative](#) [threadedcap](#) [patterned](#)

This threaded container features a patterned exterior with a knurled lid allowing you to tighten or loosen the lid using the handle on top, or the pattern on the sides. The inside is large enough to keep small parts or really anything you want inside of it.

The lid may not require supports depending on the material/ printer properties. I found that printing the lid down on the buildplate gave me the best results with PETG, but PLA should print in either orientation.

Thank you and please feel free to message me with any questions or comments
