updated 6. 5. 2024 | published 6. 5. 2024

Summary

Remixed the design to fit on the Walksnail Pro Camera. Optimal materials are ABS or PETG.

Tags: [camera](#) [protection](#) [fpv](#) [avatar](#) [drones](#) [caddx](#)
[walksnail](#)

Printed from ABS or PETG for optimal strength. Friction fit to the camera lens and body.

Adapted the design to fit on the Walksnail Pro Camera or any other 14mm camera. Simply cut it to length for shorter lenses like on the original cam.

This remix is based on

O3 Mod - Lens protection for the DJI O3 Camera. Add to any quad.
