Direct 8040 mount for the Fanatec Clubsport Shifter SQ. Allows left, right, or, centre mounting on aluminium profile. The shifter is big and heavy so will flex a little on this mount. You can reduce this by placing a second piece of profile underneath the shifter. I've made it chunky (10mm thick) to help with reducing this and rounded the edges to ensure it doesn't catch on anything.

Required Additional Hardware:

- 2x M8 x 20mm
- 2x M8 Aligning T-Nut with Spring
- 2x M6 Countersunk x 20mm (if using edge mounted print)
- 4x M6 x 20mm (only 2x required if using edge mounted print)

Optional but Highly Recommended:

- 8040/4040 profile to mount up underneath the bracket, offering more support
