This beer coaster was created for Quick and Useful Prints contest

It is simple and very useful gadget, that you can present your 3D printers quality. This print will find use in everyday life.

It is made for **indoor or outdoor** use - anywhere you want to take a beer-break

Download -> Share -> Print -> Rate -> Donate -> Enjoy -> **Thank you**

Created for printing without supports

Print instructions

Model is created for everyday use. Because I choose the PLA, I am limited to use only with cold drinks. But you can easily choose the PET-G, ASA, ABS and more

.gcode is created for PRUSA Mini/Mini+

I sliced it with the sign to the printing sheet and I used textured sheet to show nice surface.

But you can re-slice it upturn

NO supports are required
