Summary

Stop using a bench just to hold your phone.

Keep your phone off the gross gym floor, stop using benches as phone holders, and keep your phone safe from barbells!

Modeled on a Rogue Fitness wall rack and should work with any 3"x3" rack with 26mm holes. If your rack is smaller, let me know and I'll make a version for you.

There are spaces for 5mmX2mm magnets in the back but those are optional. The holder is secure without them.

Fits the following phones for sure: Samsung S10e (with [@Guido3D_199007](#)'s phone case), iPhone 13, iPhone 12 Pro.

Add your name and/or gym logo to the front for a custom look.

Prints in pics done via Cura, .25/4 walls/10% gyroid infill. Took about 1h45m on an Ender 3S1 with Sonic Pad.

Magnets will press-fit but a drop of glue never hurts.
