Tags: [box](#) [holder](#) [case](#) [lid](#) [pokemon](#) [cards](#) [psa](#) [slab](#)
[graded](#)

I designed a simple but effective slab box for 17 slabs. Keeps your graded cards free from sun, moisture and dust. The lid is pressure fit but you could scale it up or down yourself if you dont like the fitment.

Printed on a Bambulab P1S

If you want I can also upload a stand version for like conventions or just open storage.

***Update 16-05-2024:** Added version V1.1 with some thicker walls and little more width to fit sleeved slabs better. It also removes the contours of the inside from the outside. Also the lid has been changed to V1.1. Please check you download similair versions or the won't work.

V1.1 version is shown in color YELLOW!

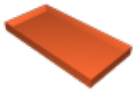

Printed:

- 0.6 nozzle
- 0.3 layer height
- 3 perimeters
- 3 top and 3 bottom layers

If you need any adjustments, let me know!

Thanks for downloading, have a good day!
