### Summary

Mount for you Apple TV 4K (2021) using VESA mounting Screw

[Gadgets](#) > [Photo & Video](#)

Tags: [mount](#) [apple](#) [tv](#) [vesa](#) [appletv](#) [vesamount](#)

This is a remix of [polmdm](#)'s original design. I've resized the model to fit the 2nd Gen (2021) model Apple TV 4K. The Apple logo has been removed in favor of slots for cooling and to save some material. The base is a bit thicker for strength and to allow for enough clearance for the VESA screw. Improved clearance for cable passthrough.

### Print instructions

Rafts: No

Supports: Yes, Organic Supports Required

Layer Height:

0.2mm .4mm Nozzle

0.3mm .6mm Nozzle

Infill: 15-20%

3 perimeters  
3 tops  
3 bottoms

Filament: ABS, PETG recommended, PLA should work fine too.
