### Summary

This is an in-wall mount got the Google Hub (5 inch)

[Hobby & Makers](#) > [Other Ideas](#)

You will need (4) #8-32 machine screws approximately 1 1/2 inches long for the dog ears

Wall cut out size is 4 5/8 x 6 1/8

There is a gap at the bottom of the hub that exposes 2 of the screws. This gap allows the sound from the hub to be a little more clear.

There are no clamps or tampering of the hub needed. It is a pressure fit. Slide in the base of the hub first, then slow push the edges of the screen into place.

No supports are needed. Would suggest a brim around the dog ears depending on bed adhesion.
