Summary

Trap for darkling beetles (and superworms sometimes, too)

[Household](#) > [Pets](#)

Tags: [trap](#) [beetle](#) [darkling](#)

I had a couple of superworms escape into our terrarium and they're breeding. I now have darkling beetles. I don't want them!
I put fish food flakes into this trap and the darklings LOVE it. Some assembly is required - I use a brass rod for the hinge for the trap door. The rod hole is 2mm, and I use it with a brass rod that measures 1.5mm. These are thin rods you can get at a hardware store in the U.S. You'll want a tight fit. Make sure you don't install the trap door upside down and that it actually opens.
