Summary

Our washer is right behind the door in the downstairs bathroom and the door knob bumps it. I designed this in 3DBuilder.

[Household](#) > [Bathroom](#)

The door handle bumps into the washer, and we just purchased it, so I decided to try to make a bumper. I created it in Windows 11 3DBuilder. It's very simple. This is the third version of it, with the semi-circular cutouts on the bumper around the lock knob. I printed it in black TPU on a Creality K1 Max.
