ISO 7010 - Mandatory Signs

Changelog:

June 19, 2024: Added 2 new Signs (M061 & M062)

Description:

In my profiles there is 1 sign per printing plate, the printing plates are named accordingly.

As the number of printing plates per profile is limited, the files are divided into several profiles.

I have uploaded profiles for AMS and without AMS, the profiles without AMS have breaks at the appropriate height for manual filament change.
