Hi everyone. I am **P1lotz**, a professional 3D artist.
I have been working in the field since 2019 and specialize in creating articulated creatures, particularly dragons.
With that said, let me present to you my new Demon Dragon!

First of all, I want to thank **FormFutura for this opportunity.**

This particular model has been printed using **morph-coloured filament** from **FormFutura**. FormFutura is a reliable provider of high-quality filaments that come in a variety of colours, making printing both effortless and perfect. The result of the different colours coming together is stunning. I love it!

FormFutura's Morph Coloured Filament

Body articulates ✓

Legs move up and down ✓

Tail moves freely around ✓

Head articulates ✓

Prints in one piece ✓

No support needs ✓

Print settings

- The dragon does not need much infill. I recommend between 10% and 20%, but 5% works as well.
- The dragon does not need any support for printing.

- The dragon can usually be printed directly on the printing bed. If any troubles occur, I do recommend printing with rafts.
- I advise avoiding using adhesion while printing the model and instead using rafts to avoid problems with articulation.

Information about Commercial license

If you want a commercial license for my dragon or any other of my designs, you can join my [printables club](#). Becoming a member allows you to sell physical copies of all my models, as long as you have an active membership. Join today for only \$8/month, to obtain the license and support me and my upcoming projects. Thank you.

Designing process

The model was created using Blender 3D. To learn how to design your own detailed articulated dragon, watch my "<https://www.youtube-nocookie.com/embed/Qzj8qyjLRts>" start="0">

[You can also view the original video by clicking on this link.](#)

The process of designing this model has been unique. The creation is partly inspired by a loved one of mine and has been my favourite model to work on by far. I hope you are going to like it as much as I do.

Help me out

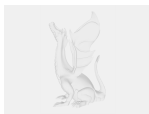

If you are interested in helping me out and making it possible for me to upload more of these free models, you can support me either with donations on [PayPal](#) or by joining my [Printables Club's supporter tier](#). By joining my Printables Club you are not only supporting me but you will obtain access to exclusive models as well.

If you have any ideas for future projects, give me a text. I will always appreciate a bit of inspiration now and then. If you have better pictures for the model, feel free to upload them, either as a make or for me to use as one of the thumbnail pictures.

Copyright

This model is 100% made by me, and you can not sell it, and reupload it without permission from me. I see people re-uploading my models all the time, which is not allowed under any circumstances and is strongly against the copyrights. If you see anyone uploading my designs, please contact me on [Printables](#) or [Thingiverse](#). Selling of the model can be allowed under certain circumstances like [membership](#). The filament used for this model is sponsored by [FormFutura](#).
