Updates

13. June 2024 - New **Minimals Savanna Pack** available!

Animals.. but mini... **Minimals!** Enjoy the first pack/collection of **safari Minimals!**

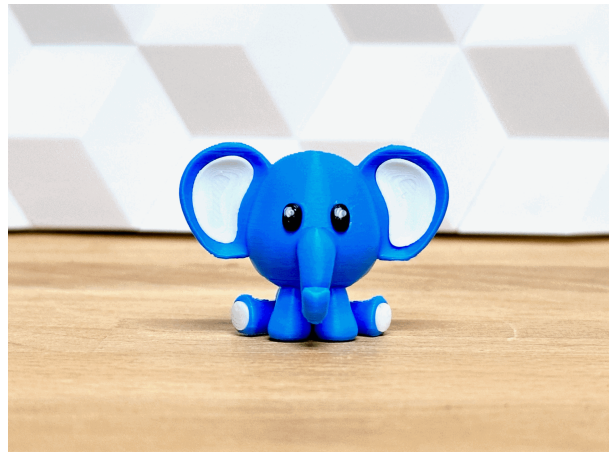

Perfect for your desk or somewhere else, where they can sit and maybe bring a smile when you see them.

This collection contains **4 animals** - but are there more coming?..

Overview

Say hi to your 4 new buddies:

- **Elly Elephant**
- **Luke Lion**
- **Maddy Monkey**
- **Chris Crocodile**

All of them comes in multiple **versions**:

- **Single file** (fx. Elephant.stl)
 - Can be printed in **single color**
 - ..or **split to parts** in slicer and printed easily in **multicolor** with an AMS
- **Multiple files** (different parts, to print in different colors separately and glued together afterwards)

Assembly

If you print the pieces separately (maybe to have multiple colors without an AMS), you need to **glue** things together. This requires a **steady hand** - they are small, and the pieces are really small. Now you are warned

Multicolor prints

This is optional - but looks nice! You can do like this (in Bambu Studio):

1. **Insert the single-file-version** you want (fx. Elephant.stl)
2. **Right click** on the model and click on **Split > To parts**
3. In the left pane **Process** click on **Objects**
4. Select **individual parts** of the model and **choose filament** for each.

Print instructions

Here is a few ideas to get started:

- **Supports:** Yes - overhangs like ears requires supports. I have mine set to Automatic Organic Tree supports with a Threshold angle of 25. Worked just fine
- **Colors:** paint in slicer
- **Orientation:** Printing the single-file-versions - just as they come. But if printing the pieces separately, you need to rotate them to optimal position (and even lowering some a bit 'below' the printbed. This is done for you in the Bambu Studio project files!

Happy printing!
