Looking for an attractive and flexible storage system to organize and protect your trading cards? Don't banish your hard sought collectibles to flimsy generic cardboard boxes in the back of your closet, store them in style in these latching modular trading card cases.

A proper collection deserves a proper storage solution—cases purposefully designed solely to keep your trading cards in mint condition while also keeping them accessible. These cases have been thoughtfully designed

with you and your card collection in mind, with a number of features that make them the ultimate trading card storage option:

- Available in three different sizes (Small, Medium, & Large).
- Stackable and easily arranged to accommodate any size collection.
- Easily assembled with a few drops of super glue.
- Compatible with sleeved and unsleeved cards as well as toploaders.
- Latches securely to keep your cards safe while remaining easily accessible.
- Use optional “Drawer Dividers” to more precisely organize your cards.
- Customize your case with one of several available “Knobs” (More coming soon!).

Though these cases were designed for Pokémon cards, they're compatible with any trading card game with 2.5" x 3.5" cards or smaller. Whether you collect Magic, Yu-Gi-Oh!, Marvel Champions, One Piece, or Disney Lorcana, your cards will fit. I'll also be designing custom knobs for each TCG so you don't have to store non-Pokémon cards in a case with a Poké Ball on the front. Make sure to drop a comment telling me your favorite Trading Card Game, and if you have an idea for a knob design, I'd love to hear it!
