Summary

two gears moving in a frame, but not falling out (print-in-place)

Tags: [fidget](#) [gear](#) [printinplace](#)

While playing with gear designs I came up with this idea, and I found it interesting enough to share. The gears can move side to side, but they don't fall out.

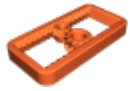

After printing the 60mm version I also uploaded two longer ones (80mm and 100mm rail length).

If you like gear fidget toys, try my [fidget gear ring](#) or my other [fidget models](#).
