updated 16. 12. 2024 | published 16. 12. 2024

Summary

(V2 Better Hinge) Simple "wet floor" style sign to mark where your cat vomitted. Easy multi-color print.

(V2 Better Hinge)

STLs can be split to parts in your slicer and changed color.

For the flush model 3 parts need to be made yellow, all the rest were black. Only needs to change filament twice so you can easily do it manually if you don't have an MMU/AMS.

For the recessed model 2 parts need to be made black, all the rest were yellow. There are 3 filament changes to get good coverage since the graphic is unsupported, still easy to do manually.
