Summary

Flexi Dog Keychain

[Toys & Games](#) > [Action Figures & Statues](#)

Tags: [articulated](#) [flexi](#) [keychain](#)

By supporting my [Patreon](#), I can continue offering free models.

Get the 'Flexi Animal Keychain' Welcome Pack, the 'Flexi Dinosaur Keychain' Welcome Pack and May Patreon Pack exclusively on my Patreon (Limited offer).

There are two versions available: the original version and the keychain version.

The keychain model is designed to use a 15mm ring. If the 15mm ring size doesn't meet your needs, you can use the cut function and a torus to create a hole in the original model using the slicer software.

The BambuLab 3MF file is available on my Patreon for Merchant members.

Printing support is not mandatory, but it can enhance the overall quality

Printing in 0.1mm layer height is recommended.

It is recommended to print in PLA+ to ensure the joints are strong enough.

This model is made available to you by UniQrint paid members.
