** Let me see what you have made. Upload a photo in Add make **

Print the letter in black or other non-translucent color.
Cover plates "adfekkapje.stl" and diffuser warm white or white, for example, Esun white-b.

Print the letter/number parts that you need.
Put the diffuse caps in the letters
Place the cover in the letter press firmly
Put 5 mm LED in the holes
Solder the LEDs and if necessary please place a resistor between the power supply and the LEDs

If you want to closed the back then you can glue cover "achterkant.stl" on it

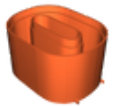

This pack includes the letters of A-Z and the numbers from 0 to 9, includes also the symbols ! ?

There is no bottom plate in this project, you have to make it yourself if you need it.
