Test how your printer renders 3D models dimensions.
Helps to know how to scale your prints to stay true to the model.
Print with a brim and measure while still glued to the plate.

If you have the option, print only the brim on the outside (otherwise, print with a narrower brim and aim straight for the center of the Z tower)
Took a bit less than 1h and 6gr of PLA filament to print on my K1C.

Model files
