Tags: [card](#) [bicycle](#) [kit](#) [bike](#) [kitcard](#)

I've made the pieces fit smoothly, adjusted tolerances, added a mountain bike handlebar, and redesigned the bike frame angle.

I've included clean STEP files if you want to modify the design to your liking.

There are also two STLs per bike to print in two colors, like in the pictures.

You can add your name to the card and bags.

Enjoy!

Slicer parameters:

- 0.2 layer height.
- No raft or brim required.

Update March 18, 2025:

I have uploaded new models with adjusted (snug) versions for higher-

quality printers like Prusa or Bambulab, with lower tolerance between parts to achieve a better fit.
