This is a single slot blower fan mount for the LSI Logic 9201-16e SAS HBA.

Blower Fan: AVC BASA0715B2U 70x70x15mm (search ebay for these)

Alternate(Not Tested): Delta BFB0712VHD - <https://www.aliexpress.us/item/3256805088116895.html>

Hardware: 2 M4x20mm screws, 2 M4 nuts

I have many of these AVC fans that were pulled from Lenovo M92P mini PCs. They are excellent for airflow. The specs on the Delta seem to indicate it's not as powerful, but I imagine it has plenty to keep this card cool.

The height of the duct may be slightly thicker than PCI spec, but it should work for most applications. If you glue the fan to the duct instead of using screws/nuts, it would be in spec as it's less than 20mm. Hope someone finds this useful.
