## Summary

Detachable propeller protectors for 55mm props

[Hobby & Makers](#) > [RC & Robotics](#)

This is designed for 55mm propellers, however I included the STEP files so you can resize as you like. Also you should print with supports, however I did not as I kinda liked the swooping filament for added protection. These support break pretty easily, but better than nothing and it has save my propellers a few times.

### Printer Settings

- Supports Enabled
- Resolution 0.2
- 100% infill
