The little Nozzle inside our Rug Doctor Pet Portable somehow cracked and broke which led to the clean water just leaking out of the handle. I tried to measure what was left of the broke nozzle and create another one. The fit is pretty tight and you may even need to shave it down for a correct fit but it works for me and I didn't see any reason to invest any more time into it since it works. Feel free to remix as needed.

Installing the Nozzle will require you to remove most of the screws in the head to pop off the plastic piece.

I printed mine as close to solid as I could and it seems to work well. The only negative thing besides a really tight fit is the nizzle produces more of a "Stream" versus a "Mist", but I was ok with that.
