- had a spare G9 socket from an old ikea lamp around and wanted to create a desk lamp for it
- based on 16mm diameter glass marbles with colored inlays
- marbles are stacked in spiral grooves
- i really love the glow and light of the lamp, absolutely happy with the design
- prints support free
- the lamp foot is specific for my kind of socket, but feel free to remix it to fit your needs
- model units are [mm]

EDIT 2018-02-11

- added new foot models to increase compatibility with other sockets
- files are named after inner diameter of the hole through the foot in [mm] "_Dxx"
- If you have need of another model for your sockets, let me know in the comments
