Nice fit individual joy-con holder. Prints with minimum support.

The base holds three units and has space underneath for two wrist straps.

Updated joy-con holder has stronger supports in the rear. no more tabs to worry about breaking of during usage.

I also addressed the interior overhang so it's not as sharp around the curves.

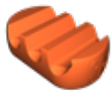

layer height .12mm

PETG does not like the exterior overhang.

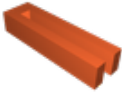

I print these with PLA and set color change at 1.2mm after starting and four layers before completion.

Hope you enjoy.
