Easy to print random snowflakes you can hang anywhere!

All the snowflakes have holes for easy hanging. You can use the included “links” to hang them together, or just a piece of string and use them as tree decorations.

I've included the SCAD file used to generate them, so if you don't like the included versions, you can generate infinitely more snowflakes!

all you need to do is open the snowflakes.scad file in openscad, change the seed and size parameters until you find one you love :)
