This is a remix of my original back scratcher. I've included all the derivatives I've created including long handles, short handles, and a PETG version that is very narrow and not PLA friendly. They all need to be printed standing up (both parts) to eliminate any uncooperative support material if you lay it flat. Also include extra shells for some added strength.

Print Settings

Printer Brand:

Prusa

Printer:

I3 MK3S

Rafts:

Doesn't Matter

Supports:

Yes

Resolution:

0.15

Infill:

40%

Filament: Inland PETG

any

Notes:

this needs to be printed standing up (both parts) to eliminate any uncooperative support material if you lay it flat. Also include extra shells for some added strength. The one titled PETG ver. is very narrow and works very well with PETG, but not to well with PLA being brittle and liable to snap under intense scratchin'
