Summary

I made these stands so you can hold your prints up for resin coating or painting

Tags: [3d](#) [tool](#) [holder](#) [stand](#) [miniature](#) [pla](#) [printing](#)
[helper](#) [painting](#) [tape](#) [resin](#) [thingiverse](#) [putty](#)

I made these so that I could fill up holes in PLA prints without them fully touching the worksurface. These are also usable as spray painting stands. I have 2 versions of each size, a flat surface one and one with a hole in the middle where you can put your tacky substance to hold your object in place better on the plate.

Dimensions:

Large Diam - 80mm

Medium Diam - 55mm

Small Diam - 30mm

Height(L & M) - 25mm

Height(S) - 15mm

Recommended Print Settings: (What my pictures show I used)

- Walls: 3
- Infill: 10%
- Ironing: NONE
- Brim: NONE
- Support: Yes (Only on the putty stands)
- Material: PLA

Notes:

You only need supports on the putty hole stands
