FigBash is a digital action figure kitbash system. Create the action figure of your dreams by

selecting its features, from hairstyles to clothing! These are 3.75 inch action figures, and options to scale the figure will be added over time. These articulated figures aren't floppy! They can hold a pose and hold weapons, just like the classic 3.75 inch figures.

Before the system's debut at MRRF 2024, we've provided two pre-designed sample FigBash action figures.

Two versions of each figure are provided; you can choose either 0.25mm or 0.30mm tolerance.

[Join the FigBash discord server](#) for access to the beta figure builder program:

You can help future FigBashers by designing and adding your own figure greeblies to the FigBash library.

Instructions for contributing new features can be found on the discord server.

How to print:

- 0.08mm layer height
- Wall Loops: 3
- Enable Support
- Support on build plate only!
- Disable Remove small overhangs
