### Summary

Remix of the OG 3D Connexion SpaceMouse Compact Handrest made to work for the Wireless Edition.

Tags: [spacemouse](#) [wristrest](#) [handrest](#)

I wanted to use the OG handrest this is remixed from, but had the Wireless Edition which is bigger than the compact one. I have model 3DX-600044 and don't know if it works for any other models. The base ring was also enlarged to press fit into the remaining pieces of the undercut feature in the original (I don't have the time/talent to make it work the exact same as the original, but it still seems to work regardless). I also didn't do the same cut into the non-pocket version because I didn't have the need for that version personally, but feel free to remix it if that's wanted.
