Summary

Digital 3D model of our texture stamp rollers – Fabrics and chainmail patterns Data ready for easy 3D printing

[Hobby & Makers](#) > [Tools](#)

Tags: [chainmail](#) [wheel](#) [diy](#) [baking](#) [homemade](#) [texture](#)
[fabrics](#) [rollers](#)

A stamp wheel from the Fabrics and chainmail Collection #18

These **digital** 3D printable models are meant to create textures in clay, polymer clay or EVA foam, and other materials.

We want to make more models like this. If you want to let us know what kind of patterns you'd like to see you can fill out [this form](#)

The download contains 1 OBJ file of rollers ready to be 3D printed and STL of handles.

SIZE

At 100% scale, the roller's dimensions are approximate:

Width 60 mm

Length 60 mm

Height 140 mm

You can scale the model as you wish but we can't guarantee that at a much smaller size, the model will print well.

3D PRINTING SETTINGS

You should print them in the direction the files are placed. We printed them all this way without support.

We recommend these settings:

Layer height 0.15 mm

Infill 15%

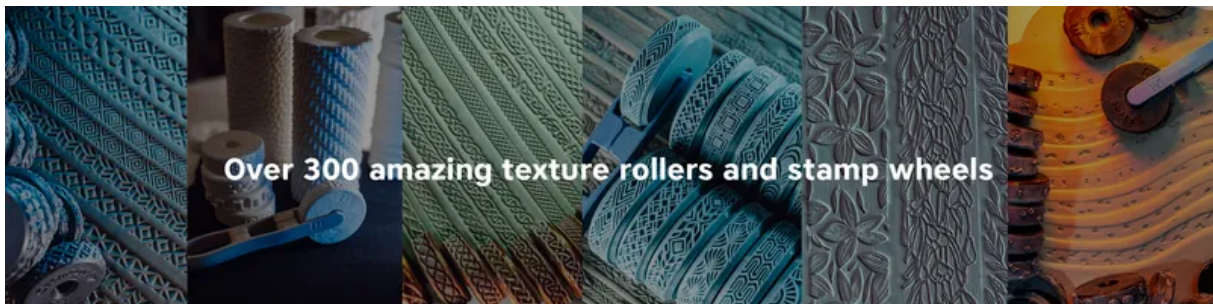

Printing settings will vary greatly depending on your specific printer.

Do you like the model and don't have a 3D printer? There are lots of people who offer 3D printing services these days. Try searching for someone who offers them in your area.

This fan-made model was brought to life by 3Demon. We are a group of modeling and 3D printing enthusiasts based in Prague, Czech Republic. Here are some links to our social media where you can join our community or just look at more of our creations:
