Summary

Here is my model of a LoL tournament trophy.

[Gadgets](#) > [Video Games](#)

Tags: [trophy](#) [of](#) [game](#) [videogame](#) [games](#) [decor](#)

[leagueoflegends](#) [lol](#) [tournament](#) [summoner](#)

Here is my model of a LoL tournament trophy, I left the "polygons" for "diamond" inserts (can get them for cheap on AliExpress, also I made a small insert for like a acrylic gamet tag if you want to give it to a friend as a gift or for private contests :D

Hope you guys like it.

I would preferably print it in PETG/ABS (for better sanding, or even vapor smoothing)

-0.12 layerheight

-30% infill (rectilinear)

-4 walls (perimeters), 3 top/bottom layers
