### Summary

Parts requiring imperial parts replaced with metric parts.

[Gadgets](#) > [Photo & Video](#)

Gimbal from Martin\_au is really nice model, but few parts are made with imperial parts, thus really hard or expensive to obtain in Europe. I replaced the thrust bearing with more common one in Europe - 51100 (with dimensions 10x24x9) and bolt holding the base plate with the bottom with M10 bolt.

Changed parts:

- base plate for two 51100 thrust bearings (10x24x9) and for M10 nut slotted inside the base plate
- base plate plug to accommodate M10 opening slot
- top plate and cover for 51100 thrust bearing

The M10 bolt length choose by your needs, depending on the attachment you need.
