updated 20. 6. 2024 | published 20. 6. 2024

Summary

I wanted to use Qi instead of USB-C to charge my phone in the car so i created this "sleeve" that slots in to the Brodit

[Hobby & Makers](#) > [Automotive](#)

Tags: [google](#) [pixel8pro](#) [pixel8promount](#)

These are the parts i am using:

Qi Charger from Amazon - https://www.amazon.se/dp/B0CDWZCMLK?ref=ppx_yo2ov_dt_b_product_details&th=1

Brodit (not this one but "same") - <https://www.brodit.se/en/product/721244>

There are some holes in the back of the mount to increase cooling and some holes in the front to tighten the side of the mount, the ball mount screw is behind the Qi charger.

Printed in PLA with 0,4 mm
