### Summary

Carry case for the Voyeager from ZSA

[Gadgets](#) > [Portable Devices](#)

Tags: [case](#) [keyboard](#) [voyager](#) [carry](#) [zsa](#)

A simple stackable carry case for the voyager.

the case can be stacked with the cover, or thanks the small magnets inside the case you can flip it on itself to save a bit of space.

you need :

6x3 magnet for the feets and the layers (20 in total)

5x1 magnets for the two voyager halves (8 in total)

the model also include dowels, they can be sloted instead of some magnets and they help avoiding the layers to slip while beeing carried.
