For every backpack without a chest strap here comes my solution.

This model can be clipped to the straps of a backpack to attach additional chest straps. Also you can attach tools and further useful devices to the holders.

The mound is suitable for backpack straps of 25 mm width. The added chest strap can be up to 17 mm wide. Additional tool can be attached by zip ties or carabiners.

Print settings:

Infill: 30%

Infill Pattern: Honeycomb

Layer Height: 0.2 mm

Perimeter Layers: 3

Support: might be necessary depending on filament and printer settings
