Tags: [mount](#) [tools](#) [pegboard](#) [toolstorage](#) [workbench](#)

I wanted a way to mount my set of T-Grips so I designed these fixtures. I wanted the size of each tool to be easily readable, so I added labeling. I also wanted a TPU liner to decrease noise and prevent the abrasive PETG-CF I used from rubbing on the tools. I included all these parts as stls for sizes 10mm, 8mm, 6mm, 5mm, 4mm, 3mm, 2.5mm, and 2mm. The “mounts” and “labels” are meant to be printed in rigid filaments of different colors, and the “inserts” are meant to be printed in a flexible filament.

Fits Pegboards With 1 Inch Spacing
