Summary

The filament/pipe holder to be used with MMU3 but not only.

[3D Printers](#) > [Accessories](#)

Tags: [holder](#) [filament](#) [pipe](#) [ptfe](#) [mmu3](#)

While in many places the 18mm material is used for furnitures the current design fits it. The filament holder keeps the spool below the tabletop, while the pipe holder may be shifted slightly to fit your needs. Three holes in the pipe holder are at +45, +90 and -45 degrees so you can adjust the direction of the pipe.
