### Summary

1 version with cold-shoe for light/flash and ball joint with standard 1/4" S, the other with Go Pro male adapter.

This mount allows you to attach the Ordoro P7 POV head-mount only camera to a standard tripod and/or Go Pro mount. I also added a cold shoe mount that can be used to connect to tripod or hold an LED light or flash.

This is my very first model so I'm sure the designs are flawed. I'm learning CAD so did a lot of things the hard way no doubt. BUT, in the end, the final 3d print worked great and looks pretty good too!!
