## Summary

This is an adapter to add a second Ethernet port to a Dell Wyse 5070 thin client. This is for Intel i210 M.2 LAN card.

The Dell Wyse 5070 is a thin client with two DDR4 SODIMM slots one M.2 PCIe slot, and one M.2 SATA slot. Typically the PCIe M.2 slot has a wireless card installed, but I wanted a second Ethernet port so I could run opnSense on the machine and use it as a router.

There are several other models for different M.2 PCIe Ethernet adapters, but none of them fit the card I bought on Amazon:

Gigabit Ethernet Server Network Adapter, M.2 A E I210AT Gigabit Server Network Card, 10/100/1000Mbps RJ45 Single Port Ethernet Card NIC for Windows, Windows Server, Linux

I printed this and it fit well. You will need four short M3 screws. Two screws mount the PCB to the printed bracket. Two more screws secure the printed bracket to the chassis. Print with supports. This computer doesn't use a lot

of power, but it is also fanless. You probably want to print using a material that can hold up to some heat.
