These Ice cube shot glasses are perfect for your next Pool or Beach party. Just pour some water in, throw the tray in the freezer, and boom, you have ice-cold shots ready : O.

This is my first version of these, and I have to be honest. The ice cubes are a little hard to remove from the mold, even tho I printed them in TPU. I recommend using some warm water for easier removal.

I am working on an improved version that I'll upload soon. Until then i hope you will have some fun with these in the meanwhile :).

Happy printing.
