updated 20. 6. 2024 | published 20. 6. 2024

Summary

This allows you to hang a Sunlu or Jayo filament dryer off the side of your stand

[3D Printers](#) > [Bambu Lab Parts & Upgrades](#)

I didn't like hanging filaments off the back of the X1 Carbon and I had a filament dryer, so why not use that.

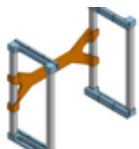

This can be used with my AMS Stand mod - <https://www.printables.com/model/915704-ams-stand-with-brace-mod>

This remix is based on

Bambu Labs AMS 2-tier stand
