### Summary

Use Fusion360 or STL files to create mounts for any 3D printable body to use on the Jiabaile 1:43 Scale AWD Drift Car

[Hobby & Makers](#) > [RC & Robotics](#)

Tags: [mount](#) [body](#) [bodymount](#) [drift](#) [driftcar](#) [jiabaile](#)

#### NOW INCLUDES STL MODELS TO IMPORT INTO YOUR PROJECT

Import your 3D printable files into this project and create your own body kits for your Jiabaile 1:43 Scale AWD Drift Car

[Here is a link to the product to make sure it's correct](#)

Sorry in advance that I developed this while I was making the mount for the VW SlamBus. So there's imprints of it's design throughout, most notably that **YOU WILL FIND THE SKETCH FOR THE FRONT MOUNT UNDER THE "VW BUS STL" COMPONENT.....**If you need it.

Convert some meshes and get to sliding.

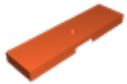

So far I've made a Mail Truck and a [Slammed VW Bus](#). I just have to figure out how to paint them.

I made this mount for myself and I shared it to the community for the love of it, if you'd like to support my other ventures:

I'm an FPV Drone Youtuber and you should check out my channel for some RC action, Thanks!
