updated 20. 6. 2024 | published 20. 6. 2024

Summary

The boxes came in, one was damaged, the lock lever broken.

Tags: [lanhub](#)

The boxes came in, one was damaged, the lock lever broken.

I took measures, I re-engineered the part for 3D-print (bit stronger by slightly thicker walls).

Printed on my Bambu A1 with 0.16mm LH in Prusament PETG black.
Replaced and it fits perfectly.
