### Summary

A simple cable clamp to keep the flat sprite cable secure.

Tags: [cable](#) [cablemanagement](#) [sprite](#) [ender3v2](#) [spritepro](#)

A simple little cable clamp to hold the flat Sprite cable in place on the old stepper motor mount. It holds the cable at an angle so it doesn't touch the threaded rod.

I print it upside down with supports, then pop-out the little circles in the holes. It prints in less than 15 minutes.

Two M3 screws / lock-nuts are needed to attach it.
