This is a cable hanger custom-fitted to clip onto the edge of a bookcase shelf. Each hanger is 3" wide and has 4 slots that are 0.18" wide by about 0.75" long. It will clip onto a shelf that has a front lip 2.0" high by 0.75" thick. With these dimensions, the hanger will snap into place. It can also be further with tape or reusable adhesive putty. I made these with PETG, but PLA would probable be fine.
