Summary

Handle with magnets for 2mm plexi to mount on 2020 extrusion

[3D Printers](#) > [Other Printer Parts & Upgrades](#)

I remixed original handle to make the door for my corexy build. Fits for 2mm plexiglass and 2020 extrusion. Uses 3mm heatsets and 2x5mm magnets. No supports needed.

The “magnet” part needs very short, about 6mm, countersunk M3 bolt and M3 T-nut to mount it on 2020 extrusion.

This remix is based on

Modern door handle
